New to INR

This course is designed for those that are new to INR testing. It provides basic information and knowledge to enable the individual that has never done the procedure before to be able to understand what INR testing is, how results can be affected and how to recognise abnormal results.

Aim and Learning Outcomes

- Understand what Anticoagulation means, why it is used and why INR testing is needed
- Understand how medications and diet can affect INR results
- Understand in-house patient testing and identify INR readings that require Urgent intervention.
